

Automatic Laminating Machine

PB - 502

The very latest in single sided lamination technology with efficient suction feeder system , large 230mm hard chrome heating roller and pneumatically controlled pressure rollers – all ensuring optimum performance and finishing of high quality litho and digitally printed sheets.

Running at a speeds of around 30m/min, the working width is 520mm enabling up to B2 or landscape or portrait fed SRA3 sheets for maximum output and finish.

The machine is quality European manufactured and has all the features required for reliable and efficient production of litho or digitally laminated sheets in a compact, easily operated construction.

Specifications

- Auto suction feeder for maximum efficiency of digital printed sheets
- Large high quality hard chrome 230mm heated roller for maximum adhesion on digital print
- Pneumatic roller pressure for maximum adhesion of film on digital print
- 520mm working width allowing landscape or portrait feeding of SRA3
- 30m/min max. speed
- Automatic sheet separator
- Sheet decurling blade
- Perforator and film cutter
- Easy load 3 function film spindle (fastening, braking & adjustment in one movement)
- Sheet size min. 210 x 250mm to max. 520 x 720mm
- Sheet weight from 110gsm-350gsm
- Weight 950 kg
- Size 2900mm x 1100mm x 1600mm
- Air supply 4 bar/150l/min
- Electrical supply 7.5kw
